Extract tables as Excel spreadsheets

You can select a table or other data in a PDF document and export it to a Microsoft Excel spreadsheet.

1. Select the table.

Open the PDF document. With the Selection tool, drag the entire area you want to export to a spreadsheet.

Name	Address	Telephone	Website	Category	Price	Hours	Capacity	Restrictions	Comments
Gary's Gart	5705 Oceanic Drive	490 63 8569	garysgart.mer	Japanese	$	1200 - 0000	200		For those who love ginger; options such as burgers and burritos for casual fare

Pierre's Platter	1598 Pompidou Road	490 98 6627	platos.mer	French	$$$	1700 - 0200	130		Located in the caves just below the city of Meridien; parking is limited

2. Export the selection.

Right-click (Windows) or Control-click (Mac OS) the selection, and choose Export Selection As. In the Export Selection As dialog box, choose Excel Workbook from the Save As Type or Format menu. Name the file, and click Save.

Acrobat reports its progress.

Tip: If you want to export an entire PDF document to an Excel spreadsheet, choose File > Save As > Spreadsheet > Microsoft Excel Workbook instead.

3. Review the file in Excel.

Open the spreadsheet in Excel and review it. The table is now ready to use within Excel.
