Customer Quotes: Adobe Unveils eLearning Suite 2, Captivate 5

"Adobe does a really good job of integrating its applications and Adobe eLearning Suite 2 is no exception. With the new round tripping between Adobe Captivate 5, Flash CS5 Professional, and Photoshop CS5 Extended, for example, we expect to save 15 to 20 minutes every time we update an image in our Adobe Captivate content. We don't see this kind of integration with other products."

—*Nelson Swartz, President, DVPRO, an interactive training developer in Camano Island, Washington, that delivers multimedia training applications for the web, kiosks, intranet, CD-ROM, DVD-ROM, and video.*

"The roundtripping capability between Adobe Captivate 5 and Adobe Photoshop CS5, Flash Professional CS5, and Soundbooth CS5 will save me hours on every project. It opens up an entirely new level of design possibilities for my eLearning content."

—*Mark Fletcher, an eLearning developer who specializes in developing eLearning content for a variety of digital media tools, soft skills, and other software applications for clients such as Wiley Publishing.*

"Adobe Captivate 5 makes it easier to create and deliver learning materials. The fact that I can deliver an Adobe Captivate 5 presentation as a desktop file, distribute it through our learning management system, or output it to PDF and e-mail it means I can meet a variety of user needs."

—*Steve Howard, Instructional Technologist, NASCO, a provider of information technology solutions including an integrated claims processing system designed to ensure that insurance claims are paid accurately and efficiently.*

"Adobe Captivate 5 will cut our production times 20% to 50% on almost everything we do because we can do so much more directly within Adobe Captivate."

—*Rick Zanotti, President and Founder, Relate Corp., a provider of professional technology-based services including web-based and instructor-led training that help improve productivity and improve bottom-line performance.*
