

Adobe Flash Player 9 Quote Sheet

Daniel Hai, Interactive Multimedia Artist

"Adobe Flash Player 9 and Flex 2 allow me to provide immersive music and video mixing capabilities through enhanced audio/visual tools. With the new ActionScript 3.0 language of Flash Player 9, I can easily mix up to six layers of video, utilize cool effects, and receive video sources from external inputs to provide my end users with a richer, more engaging music and video experience."

Chad Michael, Online Registration and Management Systems Lead Developer, Thriva

"I could not have written a 3D engine supporting XML models combined with the features I was seeking without Adobe Flex 2 and Flash Player 9. With highly-optimized performance and productivity levels intact, I can build cool and compelling 3D applications. Thanks to the performance boost from the new ActionScript 3.0 language, I can generate 3D effects that were elusive until now."

Thomas Gonzalez, Managing Director, BrightPoint Consulting, Inc.

"Adobe Flash Player 9 and Flex 2 will help take rich Internet applications to the next level. These solutions allowed us to create an easy-to-use, but extremely powerful management dashboard for deep dimensional analysis against 60,000 records of data. Flash Player 9 and Flex 2 are opening the door to the development of a new era of business applications that can pull data from multiple back-end sources and display it in a very dynamic and accessible way for the end user, without any major training requirements."

Bill Brittain, President, Is2 Software

"Adobe Flex 2 and Flash Player 9 allow my conceptual applications to come to life. These solutions enable me to create and deliver cross-platform rich Internet applications within the enterprise and across the Web. Using Flex 2 and Flash Player 9, I created a large, rich, easy-to-use application using XML and Web services that would not have been possible before this release."
