

## DATASHEET

# Macromedia® Breeze™ Government Meeting Edition

Rich web conferencing for secure, interactive web-based briefings.

Macromedia Breeze Government Meeting Edition is a special bundle of the innovative, agency-wide web conferencing solution from Macromedia. Combat-exercise tested, Breeze is a fully integrated collaboration solution that includes audio, video, whiteboard, screen-sharing, and chat capabilities and is capable of operating in extremely low-bandwidth tactical environments.

Breeze Government Meeting Edition includes everything your agency needs to securely manage and deliver rich, XML-based briefings in real time—anytime, anywhere.

### **Breeze Government Meeting Edition includes the following:**

- Breeze Communication Server
- 1 Breeze Meeting room for up to 50 concurrent users
- 1 Breeze Events organizer to manage user registration, reminders, and tracking for large online training and briefing sessions

Breeze Meeting offers unique support for multimedia content, including presentations, graphics, video simulations, and satellite imagery to deliver mission-critical information and situational awareness easily and securely. With Breeze, you can power rich, interactive real-time communication in any environment—field or office, mobile or desktop. Military stamps or custom iconography can be easily added to virtual white-boards, aiding battle planning or other complex discussions. You can even record briefings for audiences to review online at their convenience.

The Breeze product family uses the power of Macromedia Flash® Player to deliver your content. Already embedded into 98% of commercial, off-the-shelf web browsers, including those used by the Department of Defense, Flash Player gives you the flexibility you need to deploy through any standard browser—even over a dial-up connection. With embedded Flash, you can easily extend your deployment capabilities to highly portable, small-footprint devices such as PDAs. The powerful combination of Breeze and the Flash platform reduces client-side software management while enabling your rich, interactive meeting content to be cross-platform and mobile.

Breeze is DCTS JITC-approved and can be rapidly integrated with existing and evolving infrastructure investments. Additionally, the highly scalable Breeze system can be hosted on-premise, providing secure administration and control of communications.

## How to Buy

To receive more information about Macromedia Breeze Government Meeting Edition, including how to purchase or receive a free trial, please contact a Macromedia Government representative at [government@macromedia.com](mailto:government@macromedia.com) or call **(800) 945-9085**.

Macromedia Breeze Government Meeting Edition is available on the GSA and other purchasing vehicles.

## Features and benefits of Macromedia Breeze Government Meeting Edition include:

<b>Efficient Stream Management</b>	Leverage existing network infrastructure with efficient stream management, including meeting-level and end-user control over bandwidth.
<b>Scalability and Reliability</b>	Support large numbers of meeting participants in a single meeting, large numbers of concurrent meetings, and tens of thousands of registered users with enterprise-class scalability. Multi-server deployment and automatic failover support are available.
<b>Administration Control</b>	Implement Breeze according to internal best practices with system-level security and a multi-tiered, flexible deployment. Permissions are managed through flexible Access Control Lists that enable Breeze administrators to easily control access at the individual, group, and asset level.
<b>Activity Monitoring and Reporting</b>	Easily gain insight into application usage with a collection of actionable reports that include dashboard views and drill-down activity reports—of meetings, events, recorded meeting views, and system usage and quotas—for all Breeze applications.
<b>Single Sign-on and Custom Authentication</b>	Provide a seamless end-user experience across the organization with single sign-on, including support for NTLM. Extend the authentication infrastructure of Breeze to support custom authentication schemes through an authentication filter framework.
<b>Security</b>	Protect all communications between the Breeze server and clients using 128-bit Secure Socket Layer encryption, and ensure the secure delivery of data, voice, and video between the Breeze server and end users.
<b>Directory Services Integration</b>	Leverage existing user systems to synchronize directory services with Breeze using Active Directory or other LDAP systems.
<b>System Extensibility</b>	Rapidly integrate web communications capabilities with the application network through application interfaces, including integration with portals, reporting applications, content management systems, and other agency systems.
<b>Meeting Extensibility</b>	Extend the out-of-the-box web conferencing experience by developing custom meeting applications and components through a published API. Easily incorporate external data and functionality directly within Breeze Meeting using industry-standard technologies.
<b>Searchable Content Library</b>	End users can easily find and update presentations and meeting assets created by colleagues.
<b>Meeting Room Configuration</b>	End users can quickly configure live meeting room layouts to suit their presentation style and simplify meeting management. Meeting rooms, including all content, are automatically saved and always available, dramatically reducing preparation time for recurring meetings.

## System Requirements

Macromedia Breeze is available on a hosted subscription basis or as licensed software. For more information on system requirements, please see [www.macromedia.com/software/breeze/productinfo/systemreqs](http://www.macromedia.com/software/breeze/productinfo/systemreqs).

## Government Standards

Macromedia Breeze Government Meeting Edition is DCTS JITC approved, and the Macromedia Flash Player is approved for use on many government networks. Please contact your Macromedia sales representative for more information.
