

NEW RELEASE

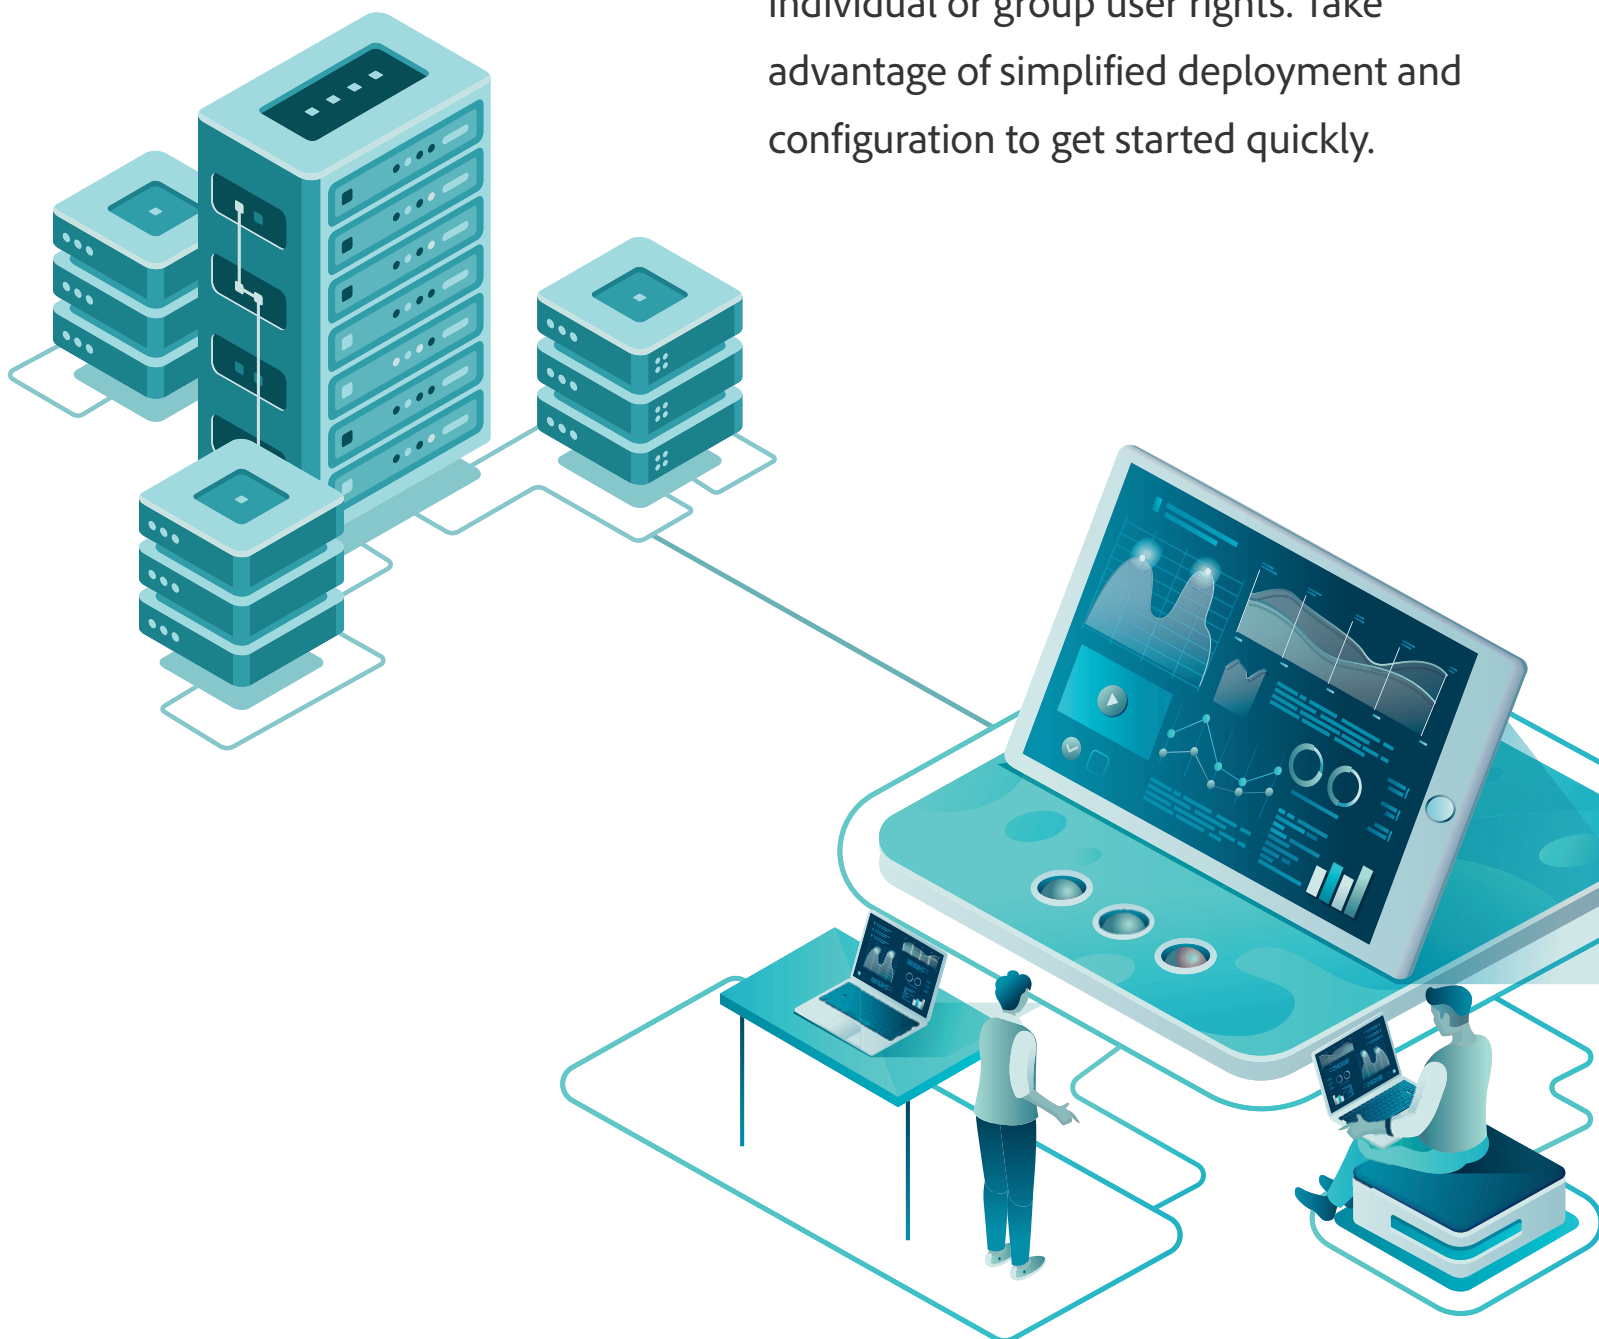

Adobe Robohelp Server

Easily host and track your online Help, policy,
and knowledgebase content

Secure Streamline Simplify

Host and track your Help, policy and procedure, and knowledgebase content with Adobe RoboHelp Server, now on an HTML5 platform. Deliver personalized experiences with new Frameless Responsive HTML5 layouts. Optimize content by leveraging powerful analytics and reporting capabilities. Manage authentication, including all-new single sign-on (SSO) support, and assign individual or group user rights. Take advantage of simplified deployment and configuration to get started quickly.

Powerful capabilities at your fingertips

Enhanced security with platform migration

The all-new RoboHelp Server is now more secure with a new HTML5 based platform that replaces Adobe Flash.

Host Responsive HTML5 Help content for all screens

Host Responsive HTML5 content, allowing end users to access content on a multitude of devices, including mobile devices. Deliver personalized content experiences with new Frameless HTML5 layouts that provide intuitive navigation, improved SEO capabilities with unique URLs, and best-in-class search output.

Make data-driven decisions with powerful analytics and reporting

Optimize your content with data tracking. Locate areas where users make repeated requests for information, find out which searches are repeated and how users navigate content, and gather operating system and browser data. Easily customize reports for Frequently Viewed Topics, Frequently Searched Terms, Search Terms with No Results, and Browser and OS usage statistics reports.

Efficiently manage user rights and data security. Get seamless self-service deployment

Segregate Help content into protected and public areas, and assign rights to individual users or groups, including view only, publish or report. Manage authentication using single sign-on (SSO), LDAP and other protocols. Easily configure RoboHelp Server to authenticate administrators and users using the Web Administrator and configuration files.

Hear from industry experts about the latest release of RoboHelp Server

“Adobe RoboHelp Server 10 has pleasantly surprised many of my enterprise-level customers. They assumed that powerful Dynamic Content Filters and Responsive HTML5 support for all screen sizes would be very difficult to deploy. Happily, Adobe RoboHelp Server 10 is easy to install and support. End-users are extremely impressed with the ability to “self-select” exactly the content they are looking for. In addition to this, there are many feedback reports and Google-style analytics that authors use to refine and update content. These are features we have not found in any other authoring tool.”

John Daigle,
Adobe Certified RoboHelp and Captivate Instructor,
Evergreen Online Learning, LLC

“In the new release of Adobe RoboHelp, the latest HTML5 Responsive Layouts support Dynamic Filtering giving users the option to filter the content and see just what is relevant to them. Content Categories in WebHelp gave users the ability to choose sub-sets that had been defined by the author. Dynamic Filtering in HTML5 goes much further as the author can give more options and the user gets to choose which ones they want. Also the author can easily create an app in both iOS and Android formats.”

Peter Grainge,
