

PLATEAU VIRTUAL LEARNING SYSTEM

WHY THE PLATEAU VIRTUAL LEARNING SYSTEM

The Plateau Virtual Learning System allows you to deliver live instruction quickly and cost effectively to employees, customers, and partners by:

- Providing seamless access, administration, and tracking of training
- Delivering presentations and conducting application demonstrations using a simple web browser
- Incorporating multimedia content
- Recording training sessions for playback
- Creating content in a live training session and incorporating it into the session in real time

The Plateau Virtual Learning System supports any telephone or Voice over IP solutions and real-time collaboration technologies from:

- Adobe Connect
- WebEx Training Center
- Microsoft LiveMeeting
- Centra

PEOPLE. PERFORMANCE. RESULTS.

Plateau Virtual Learning System (VLS) increases workforce productivity and performance by providing pre-packaged integration for virtual classroom tools to deliver live instruction quickly and cost effectively to employee, customer, and partner desktops using a simple web browser.

PRODUCT FEATURES AND BENEFITS

The Plateau VLS and supported collaboration technologies provide the following features and benefits:

FEATURE	BENEFIT
Pre-packaged Integration: Provides out-of-the-box integration between the Plateau Learning Management System (LMS) and virtual classroom tools. Changes in the virtual classroom tool do not require code changes in the LMS.	Lowers total cost of ownership through faster implementations and upgrades.
Multiple Vendor Support: Provides the ability to use multiple classroom tools including Adobe Connect, WebEx, Microsoft Live Meeting, and Centra.	Enables organizations to leverage their existing investment in a virtual classroom tool and provides users a choice of tools.
Enrollment: Manages enrollment for online synchronous events and gives learners the tools to enroll themselves – all from within the LMS.	Consolidates enrollment activities for virtual learning with classroom learning.
Attendance Tracking: The LMS can automatically record virtual classroom attendance and assign a completion status.	Allows virtual classroom instructors to focus on teaching.
Event Catalog: Online and recorded events can be offered through the LMS Catalog and users can launch the event directly from the catalog.	Users can easily manage online and classroom training from one catalog.
User Account Management: Synchronizes user accounts between the LMS and the virtual classroom tool.	Minimizes data redundancy.
Secure Connectivity: Information exchanged between the LMS and the virtual classroom tool is secured using Secure Socket Layer (SSL).	Guarantees the highest level of performance and quality of service.
Event Scheduling: Online and recorded events can be offered through the LMS catalog and users can launch the event directly from the catalog.	Easily manage the setup and scheduling of events. <i>Only provided by: WebEx Training Center, Centra, Microsoft LiveMeeting</i>
Multi-instructor Definition: Supports the definition of multiple instructors when creating a virtual classroom session in the LMS.	Provides multiple instructors privileges to start and lead virtual classroom sessions. <i>Only provided by: Centra</i>
License Verification: Verify and enforce virtual classroom in tool licenses for all users registered for a session in the LMS.	Reduces revenue loss from unlicensed usage. <i>Only provided by: Centra</i>
