

Captivate 5

ACE Exam Objectives

1.0 Creating new projects

- 1.1 Given a scenario, select the appropriate display settings.
- 1.2 Given a scenario, select the appropriate options for software simulation. (Options include: application, custom size, full screen)
- 1.3 Given a scenario, select the appropriate preferences.
- 1.4 Given a scenario, select the appropriate settings from the Recording panel. (Settings include: panning, mode, and manual recording)
- 1.5 Given a scenario, select the appropriate method for dealing with a Full Motion Recording (FMR).
- 1.6 Given a scenario, select the appropriate template. (Includes: Creating a new Project Template, Stencil workflow, new slide vs. blank slide, and best practices for using Master Slides and Object Styles)
- 1.7 Create and manage Workspaces.

2.0 Working with text captions, images, and drawing objects

- 2.1 Create a text caption by setting the appropriate text caption properties.
- 2.2 Insert an image into a slide and choose the appropriate properties.
- 2.3 Import Photoshop native documents and perform a roundtrip.
- 2.4 Add drawing objects.

3.0 Working with the timeline

- 3.1 List and describe the options available for displaying the timeline.
- 3.2 Manage objects on the timeline. (Options include: moving, hiding, locking, and extending objects)

4.0 Working with nonscoreable objects

- 4.1 Select the appropriate properties for rollover captions.
- 4.2 Select the appropriate properties for rollover slidelet.
- 4.3 Select the appropriate properties for a zoom area.
- 4.4 Select the appropriate properties for an effect.

5.0 Working with scoreable objects

- 5.1 Given a scenario, select the appropriate properties for a text entry box.
- 5.2 Select the appropriate properties for a click box.

Captivate 5

- 5.3 Select the appropriate properties for a button.

6.0 Managing animation and video

- 6.1 Select the appropriate options and import Flash video into a slide. (Includes: Flash video slide, video manager, using AME for format conversion and encoding)
- 6.2 Select the appropriate options and import animation into a slide.
- 6.3 Select the appropriate options and import text animation into a slide.
- 6.4 Given a scenario, import, format, and implement a Widget. (Includes: Widget parameters)

7.0 Working with audio

- 7.1 List and describe the options related to recording audio.
- 7.2 List and describe the options related to using text to speech.
- 7.3 Manage audio in an object, slide, or project.
- 7.4 Edit audio.

8.0 Importing and exporting

- 8.1 Given a scenario, export and import text captions.
- 8.2 Select the appropriate options for importing and linking to PowerPoint slides.
- 8.3 Select the appropriate options for importing objects from other Captivate projects.

9.0 Creating and managing skins and TOCs

- 9.1 Given a scenario, select the appropriate options in the Skin editor.
- 9.2 Select the appropriate options and configure a Playback control.
- 9.3 Select the appropriate options and configure a border.
- 9.4 Select the appropriate options and configure a TOC.
- 9.5 Select the appropriate options and configure an aggregator project.

10.0 Publishing projects

- 10.1 Given a scenario, select the appropriate publishing options from the Publish dialog box.
- 10.2 Given a format, select the appropriate options when publishing. (Formats include: Flash (SWF/F4V), APP, EXE, and PDF).
- 10.3 Select the appropriate options when publishing standalone output.
- 10.4 Select the appropriate options when publishing a Word document.

11.0 Creating compliant projects

- 11.1 Select the appropriate options, and add closed captioning to a slide.
- 11.2 Add Section 508 compliant features to a project.

12.0 Creating quizzes and managing eLearning

- 12.1 Given a scenario, select the appropriate question type. (Includes: Question widget)
- 12.2 Given a scenario, select the appropriate quiz reporting preferences. (Includes: Acrobat.com and internal server, and using the Quiz Results Analyzer.)
- 12.3 Given a scenario, select the appropriate quiz settings preferences.
- 12.4 Create and manage a question pool.

13.0 Variables and advanced actions

- 13.1 Given a scenario, select the appropriate type of variable.
- 13.2 Create and manage advanced actions.
- 13.3 Given a branching scenario, create branches using variables and advanced actions.

14.0 Reviewing

- 14.1 Given a scenario, select the appropriate Review process.
- 14.2 Create and manage review comments.
