 - Adobe Photoshop®
 - Adobe InDesign®

Debbi Correia

Adobe Certified Expert (ACE)

“I started working in Adobe Pagemaker® back in 1987. I’ve worked with all the Adobe products over the years. I’m also a technical trainer, and have been doing that since 1992.”

“I use the ACE logo on my business card. People recognize Adobe. The biggest question I get from people is ‘what do you have to do to become a certified expert?’ and they ask me if the test is hard. I say yes! The tests are thorough. You have to really know the product.”

“Above all, what I value about being an ACE is the credibility that it brings to what I do professionally. It’s one thing to say you’re an instructor, and you know the product, but quite another to say that you’ve been certified by Adobe in a particular area.”
