

HOW ADOBE PRODUCTS SUPPORT WINDOWS VISTA

This document covers these Adobe products:

- Adobe Acrobat®
- Adobe Acrobat Connect™ Professional
- Adobe Reader®
- Adobe Creative Suite®
- Adobe GoLive®
- Adobe Illustrator®
- Adobe InDesign®
- Adobe InCopy®
- Adobe Photoshop®
- Adobe Photoshop Lightroom™
- Macromedia® Studio
- Macromedia® Dreamweaver®
- Macromedia® Fireworks®
- Macromedia® Flash® Professional or Basic
- Macromedia® Flash Player
- Adobe® Production Studio
- Adobe® Audition®
- Adobe® After Effects® Professional or Standard
- Adobe® Premiere® Pro
- Adobe® Encore® DVD
- Ultra™ 2
- DV Rack HD 2
- Vlog It!
- Ovation
- Adobe® FrameMaker®
- Macromedia® FreeHand®
- Adobe® PageMaker®
- Adobe® Photoshop Elements
- Adobe® Premiere Elements

Adobe is committed to helping its customers transition smoothly to the new Windows Vista™ operating system. This document details how current and upcoming Adobe products support Windows Vista.

ADOBE PRODUCTS AND WINDOWS VISTA

Q. Will Adobe support the new Windows Vista operating system?

A. As a leading developer for Microsoft® Windows®, Adobe has a long track record of supporting the latest version of the Windows operating system. Adobe is excited about the new Windows Vista operating system and has been working closely with Microsoft to test Adobe products on prerelease editions of this operating system. Now that Windows Vista is publicly available, Adobe is conducting final testing of many of its products to:

- Identify and document issues with current versions of its software.
- Develop free patches for some of Adobe's currently available products, so they run smoothly on Windows Vista.
- Verify that upcoming releases of Adobe's products meet rigorous standards of quality and fully support Windows Vista.

Q. Do current versions of Adobe products support Windows Vista?

A. All Adobe products available as of January 30, 2007 were released before Windows Vista became publicly available and so have not been fully designed for or tested on this new operating system. However, many of those products run under Windows Vista with minimal issues. To find out more about how different Adobe products work with Windows Vista, please see specific product sections later in this FAQ.

Q. Will Adobe update currently available products to support Windows Vista?

A. Adobe has an extensive portfolio of products, each with different schedules for fully supporting Windows Vista. For example, Adobe has already released free updates to Adobe Photoshop Elements (version 5.0.2) and Adobe Premiere Elements (version 3.0.2) to deliver full compatibility with Windows Vista, and it currently plans to release a free update to Adobe Acrobat 8 and Adobe Reader 8 in the first half of 2007 to support Windows Vista. On the other hand, Adobe is already preparing to release the next versions of its professional creative products, including Adobe Photoshop, InDesign, Dreamweaver, Flash, and After Effects, in the Spring and Summer 2007 and does not plan to issue updates to current versions of those products for Windows Vista compatibility. For more details, please see specific products sections in this FAQ.

ADOBE ACROBAT AND WINDOWS VISTA

Q. Does Adobe support Acrobat 8 on Windows Vista?

A. Prior to shipping in November 2006, Adobe tested Adobe Acrobat 8 software on prerelease versions of Windows Vista. We are now actively testing Acrobat on the shipping editions of Windows Vista. Customers can install and run Acrobat 8 today with some known issues. (To find out more about these issues, visit www.adobe.com/go/support and search on the keyword *Vista* in the Adobe knowledgebase). In the first half of 2007, we expect to issue a free update to Acrobat 8 to support Windows Vista.

Acrobat 7.0 and earlier versions do not support Windows Vista. Adobe does not plan to release updates to Acrobat 7.0 and earlier for Windows Vista compatibility.

Q. Does Adobe Acrobat 8 work with Microsoft Office 2007?

A. Acrobat 8 shipped prior to Microsoft Office 2007 software. We are now actively testing Acrobat with the shipping version of Office 2007 software and Office 2007 files. In the first half of 2007, we expect to issue a free update to Acrobat 8 to support Office 2007.

Acrobat 7.0 and earlier versions do not support Office 2007 software or Office 2007 files. Adobe does not plan to release updates to Acrobat 7.0 and earlier to support Office 2007 software or files.

Q. Does Adobe Reader 8 run on Windows Vista? Do earlier versions of Adobe Reader run on Windows Vista?

A. Adobe Reader 8 has been tested on prerelease versions of Windows Vista. We are now actively testing Adobe Reader on the shipping editions of Windows Vista. Customers can install and run Adobe Reader but may run into issues. In the first half of 2007, we expect to release an update to the free Adobe Reader 8 to support Windows Vista.

Earlier versions of Adobe Reader do not officially support Windows Vista. Adobe does not plan to release updates to earlier versions of Adobe Reader to support Windows Vista.

Q. Does Adobe Acrobat Connect Professional run on Windows Vista?

A. Prior to shipping Adobe Acrobat Connect Professional software, Adobe tested this product with prerelease versions of Microsoft Windows Vista. We are now actively testing Acrobat Connect Professional on the shipping version of Windows Vista. Customers can install and run Acrobat Connect Professional on Windows Vista but may run into issues (visit www.adobe.com/go/support and search on the keyword *Vista* in the Adobe knowledgebase for details about any known issues). In the second half of 2007, Adobe expects to issue a free Service Pack that will provide client support for Windows Vista.

Macromedia Breeze® 5.x and earlier do not support Windows Vista. Adobe does not plan to release updates to Breeze 5.x or earlier versions to support Windows Vista.

Q. Does Adobe Acrobat Connect Professional and Adobe Presenter work with Microsoft Office 2007?

A. Adobe Acrobat Connect Professional and Adobe Presenter shipped prior to Microsoft Office 2007. We are now actively testing Acrobat Connect Professional and Presenter with the shipping version of Office 2007 software and Office 2007 files. In mid-to-late 2007, we expect to issue a free Service Pack that will provide support for Office 2007.

Breeze 5.x and earlier do not support Office 2007 or Office 2007 files. Adobe does not plan to release updates to Breeze 5.x to provide compatibility with Office 2007 software and files.

ADOBE CREATIVE SUITE AND WINDOWS VISTA

Q. Does Adobe support Adobe Creative Suite 2.3 on Windows Vista?

A. Adobe released Adobe Creative Suite 2.3 in November 2006 to integrate Adobe Acrobat 8 Professional, as well as to include Macromedia Dreamweaver 8 as an added bonus in the box. While Adobe Creative Suite 2.3 and its components do not officially support Windows Vista, we are not currently aware of major issues that would adversely affect customer use of Adobe Creative Suite 2.3 on Windows Vista. (Technical Support will document any known issues in the Adobe knowledgebase, which customers can access at www.adobe.com/go/support. Enter the keyword *Vista*.)

Q. Does Adobe support Adobe Creative Suite 2 on Windows Vista?

A. Adobe Creative Suite 2 was released almost two years before Windows Vista became publicly available and is not recommended for use on this new operating system. While some of its components, including Adobe InDesign CS2, Illustrator CS2, and Photoshop CS2, install and run under Windows Vista with only minor known issues, other components such as Acrobat 7.0 Professional do not support Windows Vista.

Q. I use a number of plug-ins with my Adobe software. Are those plug-ins compatible with Windows Vista?

A. When upgrading to a major new operating system like Windows Vista, you need to plan your transition and make sure that any plug-ins you rely on for daily production work will also be compatible. For information about plug-in compatibility with Windows Vista, you will need to visit the websites for or contact the developers of your plug-ins.

Q. When will Adobe Creative Suite officially support Windows Vista?

A. Adobe CEO Bruce Chizen has publicly stated that Adobe would be releasing Adobe Creative Suite 3 in the Spring 2007. Adobe Creative Suite 3 is being designed for and thoroughly tested on 32-bit versions of four editions of Windows Vista—Home Premium, Business, Enterprise, and Ultimate.

Q. In December 2006, Adobe released a public beta of Adobe Photoshop CS3. Does the beta of Photoshop run on Windows Vista?

A. Yes. The beta version of Adobe Photoshop CS3 was designed to install and run on Windows Vista. In fact, this public beta concretely demonstrates our commitment to making our creative products compatible with the new Windows Vista operating system as soon as feasible. We are currently testing the prerelease version of Photoshop on the shipping version of Windows Vista to help ensure optimal compatibility before we officially release Photoshop CS3 in the Spring 2007.

Q. Does Adobe Photoshop Lightroom® run on Windows Vista?

A. Adobe Photoshop Lightroom 1.0 will install and run on Windows Vista. However, Lightroom was released before Windows Vista became publicly available and has not been fully tested on the final shipping version of this new operating system. Compatibility testing of Lightroom is now underway. Adobe will evaluate whether to release an update to Lightroom depending on whether any significant issues emerge during this testing. One known issue is that the Lightroom CD and DVD burning tools do not currently function on Windows Vista. Technical Support will document any additional known issues in the Adobe knowledgebase, which customers can access at www.adobe.com/go/support. Enter the keyword *Vista*.

ADOBE PRODUCTION STUDIO AND WINDOWS VISTA

Q. Does Adobe support Adobe Production Studio on Windows Vista?

A. Adobe Production Studio was released a year before Windows Vista became publicly available and is not recommended for use on this new operating system. While some of its components, including Adobe After Effects 7.x, Adobe Premiere Pro 2.x, Adobe Audition 2.0, Adobe Illustrator CS2, and Adobe Photoshop CS2, install and run on Windows Vista

with only minor known issues, other key components such as Adobe Encore DVD 2.x have more significant issues installing and running as expected. For more information—and to evaluate the impact of these known issues on your workflow—please visit www.adobe.com/go/support to search the Adobe knowledgebase. Enter the keyword *Vista*.

Q. When will Adobe Production Studio officially support Windows Vista?

A. The next version of Adobe Production Studio will be certified to run on 32-bit versions of four editions of Windows Vista—Home Premium, Business, Enterprise, and Ultimate. The next release of Adobe Production Studio is expected to ship in mid-2007.

Q. Adobe recently acquired Serious Magic. Do products from Serious Magic, including DV Rack HD 2, Ultra 2, Vlog It!, and Ovation. Will these products run on Windows Vista?

A. We do not recommend running DV Rack HD 2, Ultra 2, Vlog It!, and Ovation on Windows Vista at this time. These applications will install and run for a brief period, but then will fail to activate with no current workaround for this issue. Adobe expects any future versions of these products to install and run on Windows Vista.

Q. I run Adobe Production Studio on an Adobe OpenHD certified hardware solution. Does my certified solution support Windows Vista?

A. At this time, no Adobe OpenHD certified solutions support Windows Vista. However, one of the goals of the OpenHD program is to systematically test and certify solutions that incorporate the latest technology and operating systems. Now that Windows Vista is shipping, Adobe's OpenHD Alliance partners will begin to integrate the new operating system into their OpenHD solutions, including developing and testing the drivers and other support necessary for optimal configurations. For more information about your solution, check www.adobeopenhd.com or contact your Value-Added Reseller.

About Adobe OpenHD: Adobe and Adobe OpenHD Alliance partners, including Dell, HP, Intel, Microsoft, AJA, AMD, Blackmagic, Bluefish, CineForm, Focusrite, Ciprico, Matrox, NVIDIA, and Rorke Data, run a joint certification program to deliver a high-end line of integrated Windows-based HD solutions. This program helps ensure compatibility among hardware and software components, simplify the purchase process, and give customers the confidence that they are getting a validated turnkey HD solution. For more information, visit www.adobeopenhd.com.

Q. I use a variety of video hardware, as well as plug-ins for some of my Adobe software. Are all of those components compatible with Windows Vista?

A. When upgrading to a major new operating system like Windows Vista, you need to plan your transition and make sure that all of the hardware and software components you depend on daily will also be compatible. Unfortunately there is no single source of information. Instead, we recommend making a list of the hardware and software tools you use regularly, and then visiting each related website to review their Windows Vista support statement.

MACROMEDIA STUDIO AND WINDOWS VISTA

Q. Does Adobe support Macromedia Studio on Windows Vista?

A. Macromedia Studio was released more than a year before Windows Vista became publicly available and does not officially support this new operating system. However, we are not currently aware of any major issues that would adversely affect customer use of Macromedia Studio on Windows Vista. (Technical Support will document any known issues in the Adobe knowledgebase, which customers can access at www.adobe.com/go/support. Enter the keyword *Vista*.)

Q. When will Macromedia Studio officially support Windows Vista?

A. The next version of Macromedia Studio will be certified to run on 32-bit versions of four editions of Windows Vista—Home Premium, Business, Enterprise, and Ultimate. Adobe CEO Bruce Chizen has publicly stated that Adobe expects to release the next version in the Spring 2007.

OTHER ADOBE PRODUCTS AND WINDOWS VISTA

Q. Do previous versions of Adobe creative products support the new Windows Vista operating system?

A. Neither Adobe Creative Suite 1.x nor Macromedia Studio MX 2004—nor any components of these earlier products such as Photoshop CS or Flash MX 2004—were designed to install or run on Windows Vista. In addition, older versions of Adobe's video products were not designed for Windows Vista. Adobe does not recommend trying to run these older versions of its products on Windows Vista because customers are likely to encounter unacceptable issues.

Q. Does Adobe FrameMaker 7.2 run on Windows Vista? Does Adobe plan to update it for Windows Vista support?

A. Adobe FrameMaker 7.2 and earlier do not support Windows Vista. However, Adobe currently plans to release the next major version of FrameMaker for Windows Vista.

Q. Does Adobe PageMaker 7.x run on Windows Vista?

A. Adobe PageMaker 7.x does not install or run on Windows Vista. Adobe announced in 2004 that it was ending development of PageMaker but would continue to sell and support the current version. It does not plan to update PageMaker to support Windows Vista.

Q. Does Macromedia FreeHand run on Windows Vista?

A. Adobe does not plan to update Macromedia FreeHand to install or run on Windows Vista.

TECHNICAL SUPPORT AND WINDOWS VISTA

Q. Where can I learn about any known issues with Adobe products and Windows Vista?

A. You can visit our support area on the Adobe website at www.adobe.com/go/support, and search for the latest information on known issues and possible solutions in the Adobe knowledgebase. Enter *Vista* and the name of your Adobe product(s) in the search field to look for specific results.

Q. Does Adobe offer technical support for running current products on Windows Vista?

A. Adobe offers basic support for running current Adobe products on Windows Vista. Specifically, we will:

- Research and document known issues, and possible workarounds, in the Adobe knowledgebase, which customers can find by visiting www.adobe.com/go/support.
- Troubleshoot issues with installation, crashes, printing, and other similar issues, just as we would for fully supported operating systems.
- Offer full support on how to use the features of supported applications, subject to the normal parameters of our support policies (please see www.adobe.com/support/main.html for details about our complimentary and paid support programs).

Please note that we may not be able to address installation or compatibility and other issues that arise from running current Adobe products (those released before January 30, 2007) on Windows Vista.

Q. Is there an online form for reporting issues or requesting features?

A. Yes. To report a suspected bug, please visit the Adobe website at www.adobe.com/misc/comments.html and click Report A Bug. To submit a product suggestion or feature request, visit www.adobe.com/misc/comments.html and click Product Feature Requests. Please note that we do not respond to submissions. However, your submissions will be presented to the appropriate Adobe product team.

AT A GLANCE: ADOBE PRODUCTS AND WINDOWS VISTA SUPPORT

Q. Adobe has an extensive portfolio of products. Is there a quick way for me to check which products support Windows Vista?

A. We have compiled the following chart to make it easier for you to check specific products. This chart will continue to grow as more testing and support information becomes available across our products.

ADOBE PRODUCTS AND WINDOWS VISTA		
RELATED PRODUCTS	SUPPORT FOR WINDOWS VISTA	HOW IT RUNS ON WINDOWS VISTA
Adobe Reader 8	Not officially	Installs and runs with some known issues.
