Adobe

Centralize your video production ecosystem with Frame.io and Adobe Creative Cloud.

In today's ever-changing business landscape, video production teams need to create high-quality content at a faster rate than ever. Disconnected tools, inefficient processes, and dispersed teams can stall projects, preventing a smooth journey from kickoff to wrap on every project. These obstacles can lead to slow production timelines, workflows that don't scale, and reduced creativity.

Teams need a centralized hub for video production to speed up timelines, scale workflows, and maximize their talent and existing tools. Selecting a solution that works effortlessly alongside existing creative apps and workflows is crucial to streamlining collaboration and scaling output without adding a new layer of complexity.

Frame.io is a cloud-based collaboration platform that connects video production processes from beginning to end, allowing teams to quickly create and scale high-impact content. Frame.io natively integrates with Adobe Premiere Pro and After Effects, helping your creative team make the most of your existing Adobe Creative Cloud video apps and workflows.

Scale processes smoothly with a centralized hub for video production.

As consumer demand for video grows, simplifying workflows between your production team, stakeholders, reviewers, and vendors is vital to staying ahead of content needs. Frame.io is your one-stop shop to:

- **Collaborate efficiently** with cloud-based review links and tools, shortening revision cycles and minimizing edit rounds

- **Share media and files** with lightning-fast file transfers and video uploads

- **Track reviews and feedback** with real-time updates and searchable comments

- **Streamline workflows** with a centralized platform and automated processes

- **Accelerate timelines** with integrated tools and unified systems

- **Secure and protect content** with advanced features like role-based project access, single sign-on (SSO), two-factor authentication (2FA), user-specific watermarks, and link expirations

> **A big part of the level of collaboration and organization that we have is the fact that we're all able to follow the same systems and processes. Everyone knows how the media is organized, where to get files, and who to ask for what.**

Derek Brown
Head of Operations
MALKA Media

Full-service content studio **MALKA Media** centralizes its video production processes with Frame.io, producing 50 TB of weekly content with 200 people from coast to coast. Integrations with Premiere Pro and After Effects allow MALKA to link Frame.io review feedback directly to projects, which shortens review cycles and enables collaboration with creatives on video projects worldwide. Working with enterprise customers like Amazon, Morgan Stanley, MoneyLion, and Netflix, MALKA relies on Frame.io to keep sensitive content secure throughout the production process.

Eliminate project delays with effortless integrations and time-saving features.

Cloud-based collaboration tools within Premiere Pro and After Effects. Frame-specific comments and instant notifications right in your team's editing timelines speed up content velocity and keep video projects moving.

Stacked versions and side-by-side reviews. Review features like version stacking and comparisons allow teams to stay organized and assess the most recent updates, ensuring no feedback slips through unnoticed.

Camera to Cloud media uploads. Instant video and photo uploads from the set to the cloud do away with costly hard drives and free your team from linear production timelines. The best part: Frame.io automatically organizes all your files in folder structures by date, type, and device, so your production-to-post handoff is snag-free.

Fast uploads and downloads with Frame.io Transfer App and Watch Folders. Single-click transfers preserve intuitive folder structures and reliably move large files or projects from desktops to the cloud with a single click, preserving intuitive folder structures. Even if there are connection issues or a device restarts, Frame.io will resume the process and ensure indestructible uploads, giving teams peace of mind when working on video content.

Trusted security controls. Secure collaboration tools give teams control over who can access pre-launch content. Teams can create invite-only projects, time-bound links, and password-protected files with user-specific video and forensic watermarks to verify that work-in-progress, confidential content stays within designated teams.

Frame.io is a scalable video collaboration platform that can cut video turnaround times by 31% and improve client satisfaction by 36%. Accelerate your production workflows by sending media right from your camera to stakeholders anywhere with Camera to Cloud. Streamline your creative process with centralized asset storage, seamless integrations with Adobe Premiere Pro and After Effects, and frame-accurate video reviews so you can collaborate in real time with distributed team members. Protect your creative assets with enterprise-level security and access controls. With a modern video workflow, your team can work at the speed of creativity.

Video collaboration designed for business.
