To All Licensees, Distributors of Any Version of BSD:

As you know, certain of the Berkeley Software Distribution ("BSD") source
code files require that further distributions of products containing all or
portions of the software, acknowledge within their advertising materials
that such products contain software developed by UC Berkeley and its
contributors.

Specifically, the provision reads:

"  * 3. All advertising materials mentioning features or use of this software
     * must display the following acknowledgement:
     *  This product includes software developed by the University of
     *  California, Berkeley and its contributors."

Effective immediately, licensees and distributors are no longer required to
include the acknowledgement within advertising materials. Accordingly, the
foregoing paragraph of those BSD Unix files containing it is hereby deleted
in its entirety.

This script is compatible with the BSD install script, but was written from scratch. It can only
install one file at a time, a restriction shared with many OS's install programs.

This source code was modified by Martin Hedenfalk <mhe@stacken.kth.se> for
use in Curl. His latest changes were done 2000-09-18.

It has since been patched away like a madman by Daniel Stenberg
<daniel@haxx.se> to make it better applied to curl conditions, and to make
it not use globals, pollute name space and more. This source code awaits a
rewrite to work around the paragraph 2 in the BSD licenses as explained
below.
