

Adobe FrameMaker Publishing Server (2017 release)

The all-new
Adobe FrameMaker
Publishing Server
(2017 release)

Make your publishing as mobile as you are.

Adobe FrameMaker Publishing Server (2017 release) is an enterprise software to automate multi-channel, multi-device publishing. Allow multiple users to access publishing services remotely, and manage your publishing setup with a comprehensive dashboard. Output technical content in multiple formats: Responsive HTML5, Mobile App, PDF, EPUB, Kindle, Microsoft HTML (CHM), Adobe Experience Manager Mobile, and Basic HTML. Leverage out-of-the-box support for leading CMSs, or use the web APIs to smoothly integrate with other CMSs.

Manage publishing remotely

Automate multi-channel, multiscreen publishing over the web with Adobe FrameMaker Publishing Server. Multiple users can access powerful publishing services simultaneously using just their web browsers.

Automate tasks with ease

Take advantage of automatic publishing capabilities by scheduling tasks from an easy-to-use dashboard. Eliminate repetitive processes with templates and presets. Work efficiently with scripting support, shared APIs, and Windows Task Scheduler integration.

Deliver content to any device

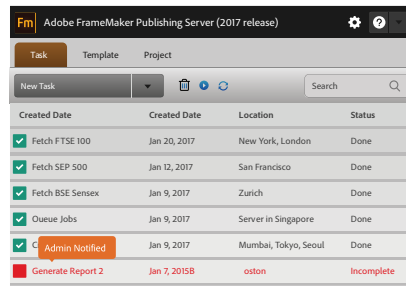

Automate delivery across multiple channels and devices in multiple formats, including mobile apps. Provide a rich viewing experience through new frameless HTML5 layouts. Help users find relevant content faster with dynamic filters.

Work with any Content Management System

Get out-of-the box support for leading CMSs like Adobe Experience Manager, EMC Documentum, and Microsoft SharePoint. Easily set up integrated publishing workflows between FrameMaker Publishing Server and your CMS using web APIs and third-party plugins.

- **Automated publishing delivered remotely**

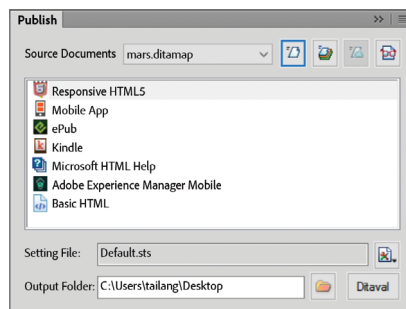

Access the powerful, automated, multi-channel, multiscreen publishing capabilities of Adobe FrameMaker Publishing Server (2017 release) as a web service. Work more flexibly by scheduling publishing tasks anytime, anywhere using your web browser. You can also integrate and schedule the FrameMaker publishing service from your content management system.

- **Server-based publishing**

Schedule your publication tasks to be automatically executed once, daily, weekly, or monthly.

- **Comprehensive multiuser support**

Allow multiple users to access publishing services and run tasks remotely, at the same time, using their web browser. On logging in, users are able to see their own publishing tasks, output status, next-run date and time, and logs generated; as well as their templates and presets, and shared templates.

- **Out-of-the-box multi-channel, multi-device publishing**

Deliver your technical content to multiple channels, formats, and devices from within FrameMaker Publishing Server (2017 release). Publish to popular output formats like Responsive HTML5, Mobile App, PDF, EPUB, Kindle, Microsoft HTML (CHM), Adobe Experience Manager Mobile, and Basic HTML. Define settings once and share them organization-wide.

- **Bidirectional language publishing**

Publish documents with bidirectional content, including XML/DITA content, from within FrameMaker (2017 release) in multiple formats: Responsive HTML5, Mobile App, PDF, EPUB, Kindle, Microsoft HTML (CHM), Adobe Experience Manager Mobile, and Basic HTML. Optionally, flip the HTML5 layout so that the navigation pane appears on the right for RTL content.

- **Single-click Responsive HTML5 publishing**

Generate stunning Responsive HTML5 output for multiple devices with just one click, even for your legacy content. Provide a consistent user experience across multiple screen types by simply selecting a single layout from a gallery of Responsive HTML5 layouts. Leverage the Responsive HTML5 output to create mobile apps easily.

Top reasons to buy Adobe FrameMaker Publishing Server (2017 release)

- **Next-generation Responsive HTML5 layouts**

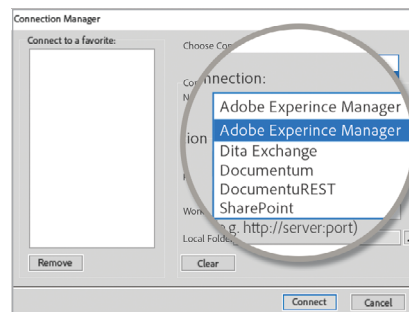

Create new frameless Responsive HTML5 layouts that deliver an intuitive navigation experience. Deliver faster search results with first-of-its-kind search autocomplete.

- **Personalized dynamic content**

Empower users to find relevant content faster in the document, TOC, index, and glossary. Leverage existing conditional tags and expressions to enable end users to dynamically filter content in the final HTML5 output to deliver personalized help experiences.

- **Native integration with Adobe Experience Manager**

Publish DITA content to other formats like Responsive HTML5, PDF, EPUB, and Kindle, using the tight integration between the XML Documentation Add-on for Adobe Experience Manager and FrameMaker Publishing Server (2017 release).

- **Integration with CMSs**

Leverage built-in connectors to industry-leading CMSs, Adobe Experience Manager, EMC Documentum, Microsoft SharePoint, and DITA Exchange CMS. Use the Repository view to check out files, manage dependencies, monitor versions, and perform searches, even with custom metadata. Get a set of APIs to connect your enterprise authoring environment with virtually any CMS.
