FOR IMMEDIATE RELEASE

# Cut Through the Clutter and Discover Documents on Demand in New Adobe Scan

**Hong Kong — 22 November, 2017** — People can easily forget where they have saved a photo when they need to find a specific one due to huge amount of pictures taken accumulatively. Having to scroll back through all the photos of kids, pets, sunsets and selfies might be a good trip down memory lane, but it is not efficient when all the user need to do is find that contract for the kitchen remodel.

Now, [Adobe Scan](#) can alleviate all of that time-consuming searching and scrolling when all the user is looking for is a document. With the flick of a switch, [Adobe Sensei](#) – an artificial intelligence (AI) and machine learning technology – analyzes all of the photos in a user's camera roll and singles-out only the ones that appear to be documents. There is no longer a need to sift through hundreds or even thousands of images to find what the user is looking for. In fact, Adobe Scan is the only free app that automatically searches for documents, receipts, business cards, and more, so that a user can find what is needed fast. See [how it works](#).

In addition to the new Adobe Sensei-powered document discovery capability, a few other features have been added that make finding and working with documents on the go much easier. Now, users can find their files more easily by searching by name or date. On iPhone and iPad, they can access their Adobe Scan files through the new iOS 11 Files app so they do not have to toggle back and forth between apps. On Android, they can access scans even when they are offline. Also improved is the image cleaning in Adobe Scan, specifically for shadows and folds, so the scans will look clearer and cleaner than ever before.

People are using and loving Adobe Scan to save their favorite recipes, archive important contracts, breeze through expense reports and more. Since [launching Adobe Scan](#) in June, the app has been downloaded more than four million times and it continues to receive great ratings across [iOS](#) and [Android](#). All of this powerful scanning technology, including document discovery and OCR, is available for free.

As a Document Cloud subscriber, users can do even more with Adobe Scan – edit and organize documents, collect signatures and take advantage of mobile features in Adobe Sign to digitally sign and send documents from any device. Adobe continues to deliver new and exciting features in our mobile apps to make users' digital transformation even more enjoyable.

## About Adobe Document Cloud

At the heart of Adobe Document Cloud is Acrobat DC, the world's best PDF solution; Adobe Sign, the leading solution that makes it easy to automate every task in a document workflow; and companion mobile apps like Adobe Scan and Adobe Acrobat Reader that help people get work done from anywhere. Acrobat, together with Acrobat Reader, is one of the most widely distributed pieces of software, used on over a billion

desktops and mobile devices, and more than six billion digital and electronic signature transactions are processed through Document Cloud each year. Global businesses like Deloitte, Diners Club, MasterCard, Perkins Cole, The Royal Bank of Scotland and Verizon are using Adobe Document Cloud and Adobe Sign to digitize customer experiences. With data centers in the U.S., UK, Germany, Japan and Australia, organizations around the world rely on Document Cloud and Adobe Sign for fast, secure and mobile e-signatures from anywhere.
