FOR IMMEDIATE RELEASE

Media Alert: Adobe Announces New Feature “Modify Scan” in Adobe Scan and Enhancements in Adobe Sign

Hong Kong — 22 March 2018 — Adobe (Nasdaq: ADBE) has introduced a new feature called Modify Scan in [Adobe Scan](#) and enhancements in [Adobe Sign](#) under Adobe Document Cloud. With Modify Scan, users can now add, delete or reorder individual pages and re-crop or re-clean scans saved in cloud, without using powerful tools like Acrobat or Photoshop. As for Adobe Sign, Adobe has added more forms automation functionality by including a new way to collect online payments, furthered integration with human resources, announced new cloud-based digital signature partners and rolled out new enhancements for life sciences and pharmaceutical companies.

Adobe Scan, one of the most popular scanning apps, now pushes the quality of scanning results to the next level even if the images were taken, saved or captured in a hurry. The latest updates include:

- Adjust the cropping and cleaning of an individual page within a multipage PDF;
- Add and remove pages within a multipage scan;
- Replace a page within a multipage scan by taking the following steps:
 - Delete the page the user wants to replace;
 - Take another scan of the page one wishes to add;
 - Insert the newly scanned page into the multipage PDF wherever the user wants.

In addition to modifying existing scans, now Adobe Scan automatically detects low light conditions and turns on the flashlight to capture a clearer and brighter image when necessary. The app even recognizes and lightens dark shadows. Also improved are the overall capture, cropping, and cleaning of scans in any light.

Apart from the new feature of Adobe Scan, Adobe Document Cloud has brought the below enhancements to another key product Adobe Sign, one of the fastest-growing e-signature and process automation solutions in the world.

- [Payments incorporated into forms](#)
Adobe has partnered with leading payment gateway provider Braintree, a PayPal service, to allow Adobe Sign and Braintree customers to easily and securely collect payments as they fill and sign forms. Braintree, which supports over 130 currencies and provides merchant services in 44 countries, fosters transactions to be completed on any device across the globe.

- **[Integration with SAP SuccessFactors](#)**
With the integration of Adobe Sign and SAP SuccessFactors, users will be able to create and send offer letters and onboarding forms with Adobe Sign directly from the SAP SuccessFactors workspace in the coming weeks. When documents are signed and approved, they are automatically stored in SAP SuccessFactors for a seamless and end-to-end digital workflow. This integration between Adobe and SAP will ease hiring, onboarding and manual paperwork.
- **[Cloud-based digital signature momentum](#)**
Adobe Sign, which defines Adobe's leadership in cloud-based digital signatures, continues to expand with the closer relationship with Cloud Signature Consortium. In the near future, Adobe Sign will work with a group of new certificate digital ID providers, such as Asseco Data Systems, ATOS Worldline, BankID Sweden, Certinomis, GlobalSign, Swisscom, and UniverSign.
- **[Life sciences compliance](#)**
New Adobe Sign capabilities include verifying signer's identity at the time of signing and requiring the signer to specify a reason for signing, both of which are requirements specified by FDA 21 CFR Part 11, the globally-accepted regulation for electronic records and signatures in the biopharma industry. Life sciences and pharmaceutical companies can easily and confidently apply the necessary controls to comply with FDA 21 CFR Part 11 through multi-factor e-signature authentication or the more rigorous certificate-based digital signature authentication.

About Adobe Document Cloud

At the heart of Adobe Document Cloud is Acrobat DC, the world's best PDF solution; Adobe Sign, the leading solution that makes it easy to automate every task in a document workflow; and companion mobile apps like Adobe Scan and Adobe Acrobat Reader that help people get work done from anywhere. Acrobat, together with Acrobat Reader, is one of the most widely distributed pieces of software, used on over a billion desktops and mobile devices, and more than six billion digital and electronic signature transactions are processed through Document Cloud each year. Global businesses like Deloitte, Diners Club, MasterCard, Perkins Cole, The Royal Bank of Scotland and Verizon are using Adobe Document Cloud and Adobe Sign to digitize customer experiences. With data centers in the U.S., UK, Germany, Japan and Australia, organizations around the world rely on Document Cloud and Adobe Sign for fast, secure and mobile e-signatures from anywhere.
