

Abhay Parasnis

Chief Technology Officer and Executive Vice President, Strategy and Growth

Abhay Parasnis is Chief Technology Officer and Executive Vice President, Strategy & Growth of Adobe, one of the largest and most diversified software companies in the world.

Continuous reinvention and innovation are at the core of Adobe's culture. As CTO, Parasnis is charged with setting vision, technology strategy and driving the overall product engineering and data science agenda across the company's entire portfolio. Abhay also oversees Adobe Research and its impact in areas such as artificial intelligence (AI), machine learning (ML), immersive media, document intelligence and analytics. He spearheads Adobe's AI transformation through its pioneering work with Adobe Sensei, the magic powering intelligent capabilities behind the world's best digital experiences.

In addition to his CTO charter, as EVP of Strategy & Growth, Abhay is also responsible for guiding overall corporate strategy, strategic M&A and global partnerships for Adobe.

Before joining Adobe in 2015, Abhay spent a decade at Microsoft in various leadership positions driving strategic platform initiatives and consumer technologies for the company. He has also held senior leadership positions at several major technology companies, including Oracle, i2 and IBM. He has contributed to 25 patents.

When Abhay is not at Adobe, you might find him pursuing landscape photography, which has inspired breakthrough ideas such as Photoshop Camera.

Adobe is changing the world through digital experiences. For more information, visit www.adobe.com.
