FOR IMMEDIATE RELEASE

# Adobe Introduces Document Collaboration Feature for Photoshop, Illustrator and Fresco

Hong Kong — February 23, 2021 — Adobe (Nasdaq: ADBE) has made collaborating with others much easier when working together on [Photoshop](#), [Illustrator](#) and [Fresco](#) documents with a new Invite to Edit feature, a huge time saver for teams involved with shared projects. Moreover, Adobe has introduced Preset Sync in Photoshop to give working across devices a boost in efficiency.

## Invite to Edit in Photoshop, Illustrator and Fresco

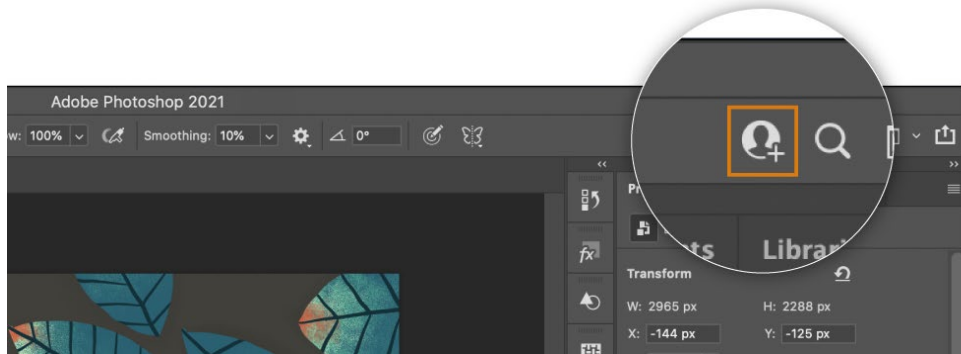

Image 1: Open a cloud document in Photoshop and tap the Invite to edit icon in the top right corner of the app.

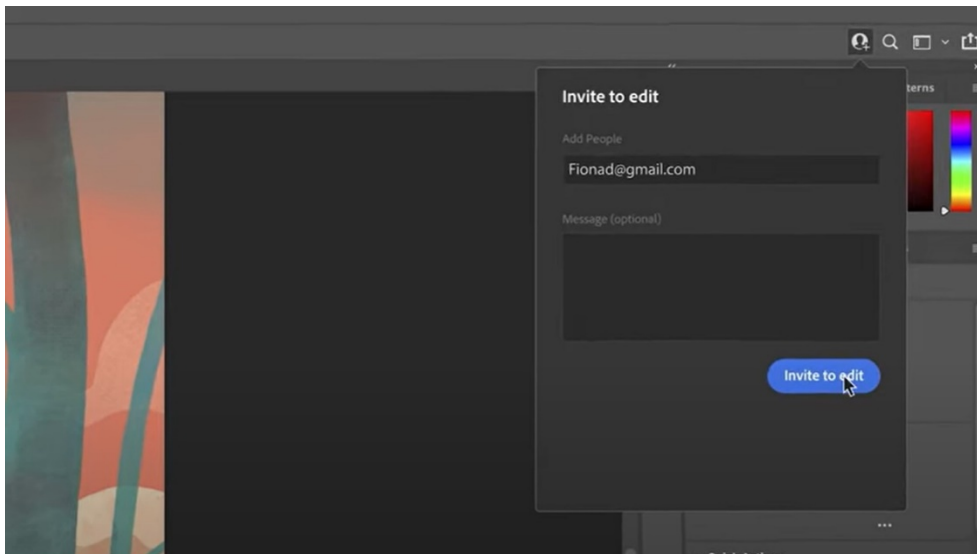

Image 2: Tap the Invite to edit button to send the invitation.

The Invite to Edit feature in Photoshop, Illustrator, and Fresco allows asynchronous editing on all surfaces across the desktop, iPad, and iPhone (for Fresco only). Now collaborators can edit a shared cloud document, one at a time. They just need to save their .PSD or .AI files as cloud documents and send invitations for others to edit them. Users can also edit files that have been shared with them. In addition, users can access their shared cloud documents on [assets.adobe.com](https://assets.adobe.com) and the [Creative Cloud](#) Desktop app.

### Preset Sync in Photoshop

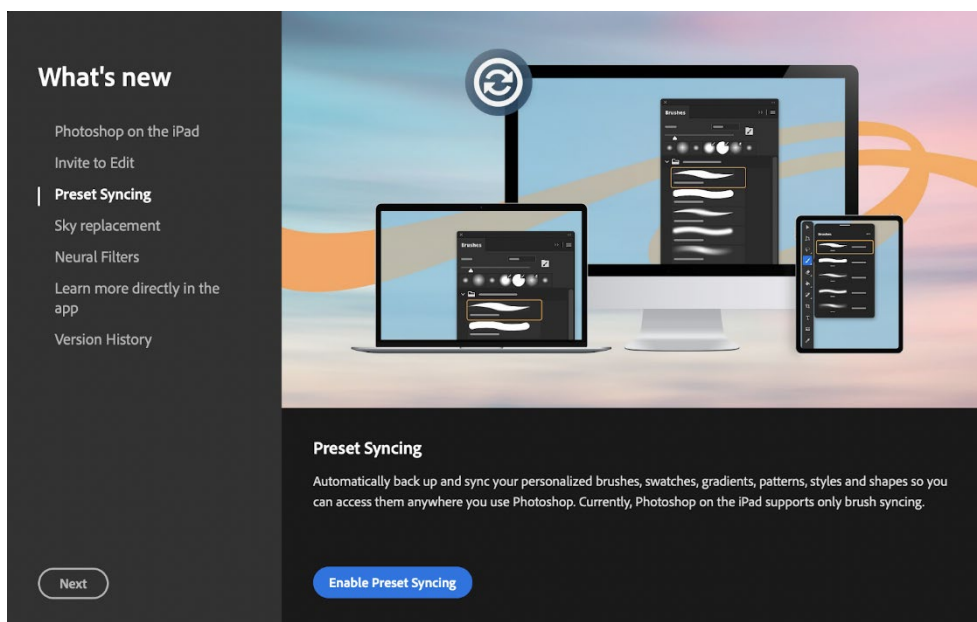

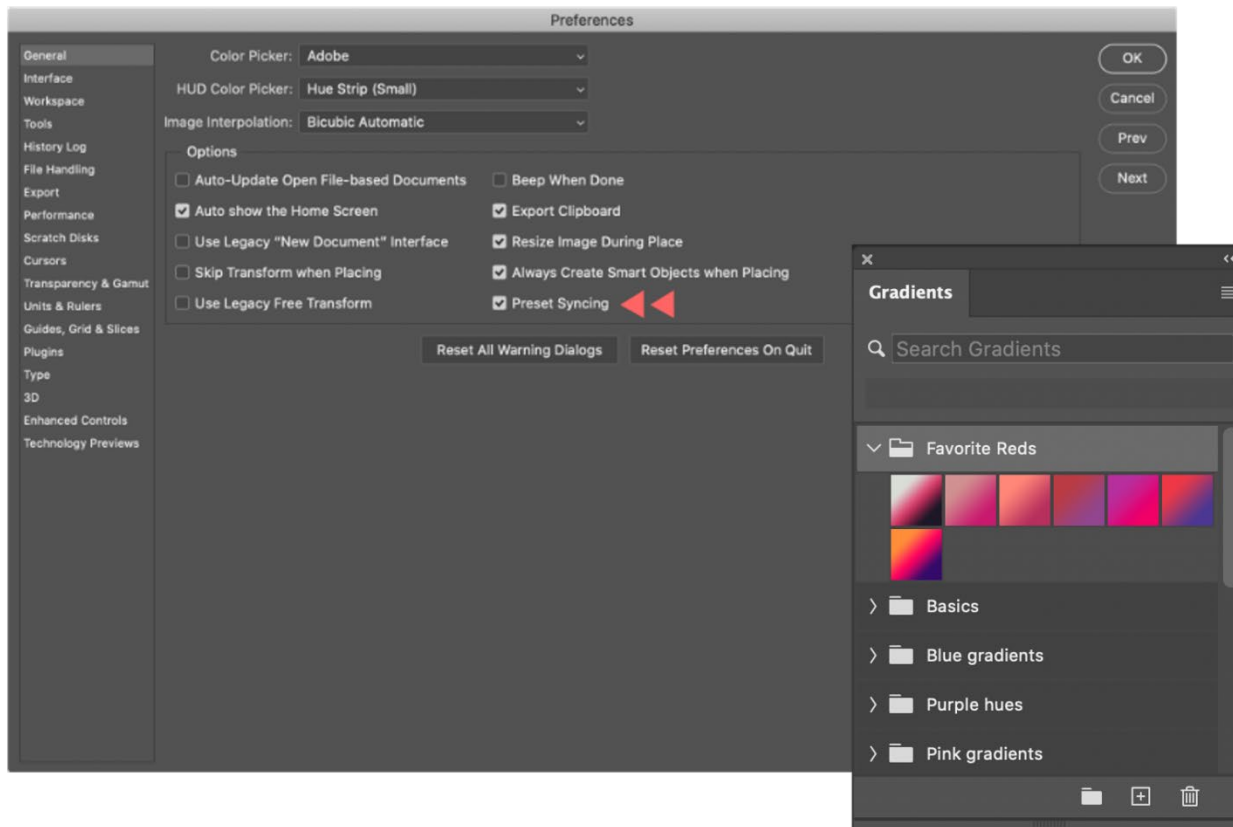

Image 3: When Preset Syncing is enabled, users' presets on one device will sync up their Creative Cloud and sync down to any other desktop devices they log into using the same Adobe ID.

Now users can sync their Photoshop presets wherever they use Photoshop. These includes brushes, swatches, gradients, patterns, styles and shapes. Preset Sync is shipping recently in the desktop version on Mac and Windows, and synced

brushes will be coming soon on the iPad version. Users turn preset syncing on and off in Preferences>General>Preset Syncing, and presets will be available just how they like them: the folder structure, the grouping and order of their presets are retained across devices. Any management preferences they've done will be synced.

*Image 4: Preset Syncing is turned off by default. Users can enable or disable Preset Syncing in Preferences > General > Preset Syncing.*
