

Now that you've downloaded your preset, here are some quick tips to get you started.

For Lightroom (version 1.3 or later):

1. Download the [Adobe Lightroom free trial](#) on your desktop
2. Open Adobe Lightroom
3. Open the photo you would like to edit
4. In the edit panel on the right-hand side, click on 'Presets'
5. Click on 'more' (the three dots) > Import Presets
6. Select the downloaded preset file and click 'Import'
7. You'll find the imported preset in the Presets list
Select it to apply the preset and you're done.

In the Lightroom mobile app:

1. In the desktop version of Lightroom, click the cloud icon in the top right corner to check your device is connected
2. Then, log in to your Lightroom mobile app and make sure the sync is switched on
3. You're now ready to edit on mobile.
