Notes on database driver and Java support:

The use of additional third-party JDBC drivers is supported. However, Adobe is not responsible for issues arising specifically from the use of those drivers or for supporting the third party.

All ColdFusion users can upgrade Java to the latest minor version for their ColdFusion servers.
(At the time of writing, the current version is Java 11.) All future Java releases will be announced

DISCLAIMER: This document is intended to provide information about the possible platform combinations available at the time of its writing. Some platform combinations may not be supported by vendors of the various components of the platform (operating system vendor, web server vendor, JDK provider, and so on). Please refer to each vendor’s system requirement and support policies to ensure the combination you plan to run is supported.
