VOICE OF THE CUSTOMER

“If we didn’t use Creative Cloud for teams, we’d have to find different software solutions, and that would mean managing more people. It’s nice there’s continuity between programs to help us avoid those additional needs.”

Executive creative director, animation

“The cost now is more predictable and lower as the admin console helps us scale up and down on an ‘as-needed’ basis versus having unallocated licences for the sake of future work.”

Vice president of IT, marketing
