Cross-channel insight power in Adobe Product Analytics

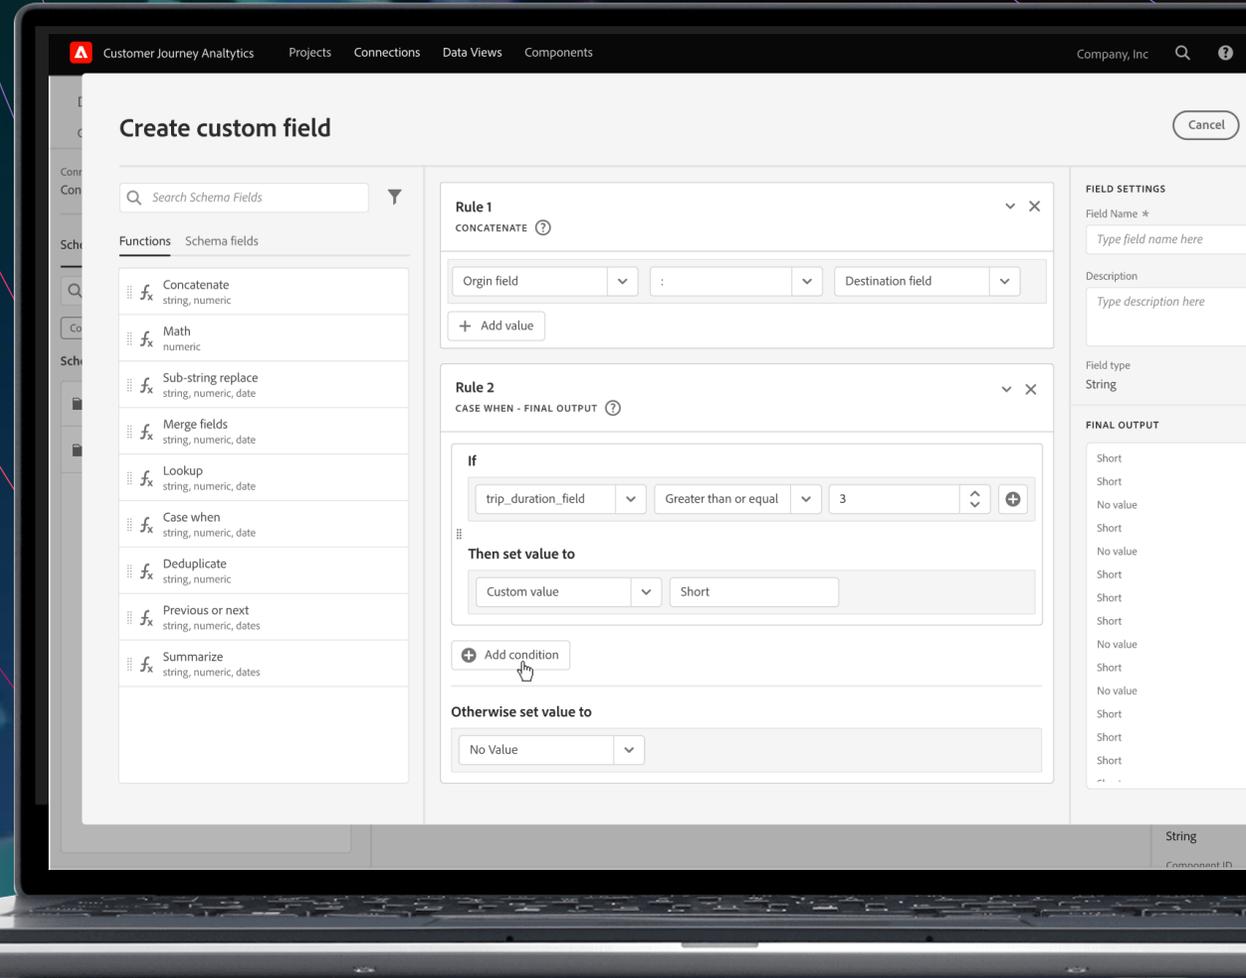

Enable real-time customer decision making and understand the impact of each customer touchpoint throughout journey.

Derived Fields

Instantly and retroactively apply complex data changes on-the-fly, without the need to rewrite and re-ingest data.

Significantly reduce costly IT cycles for sophisticated data updates – profitably speeding up time to insight for critical business questions.

Actionability

3

Democratised
Insight Discovery

Value of Democratisation

Companies that democratise insights are...

2.5X

More likely to have a customer-centric culture

AND

1.6X

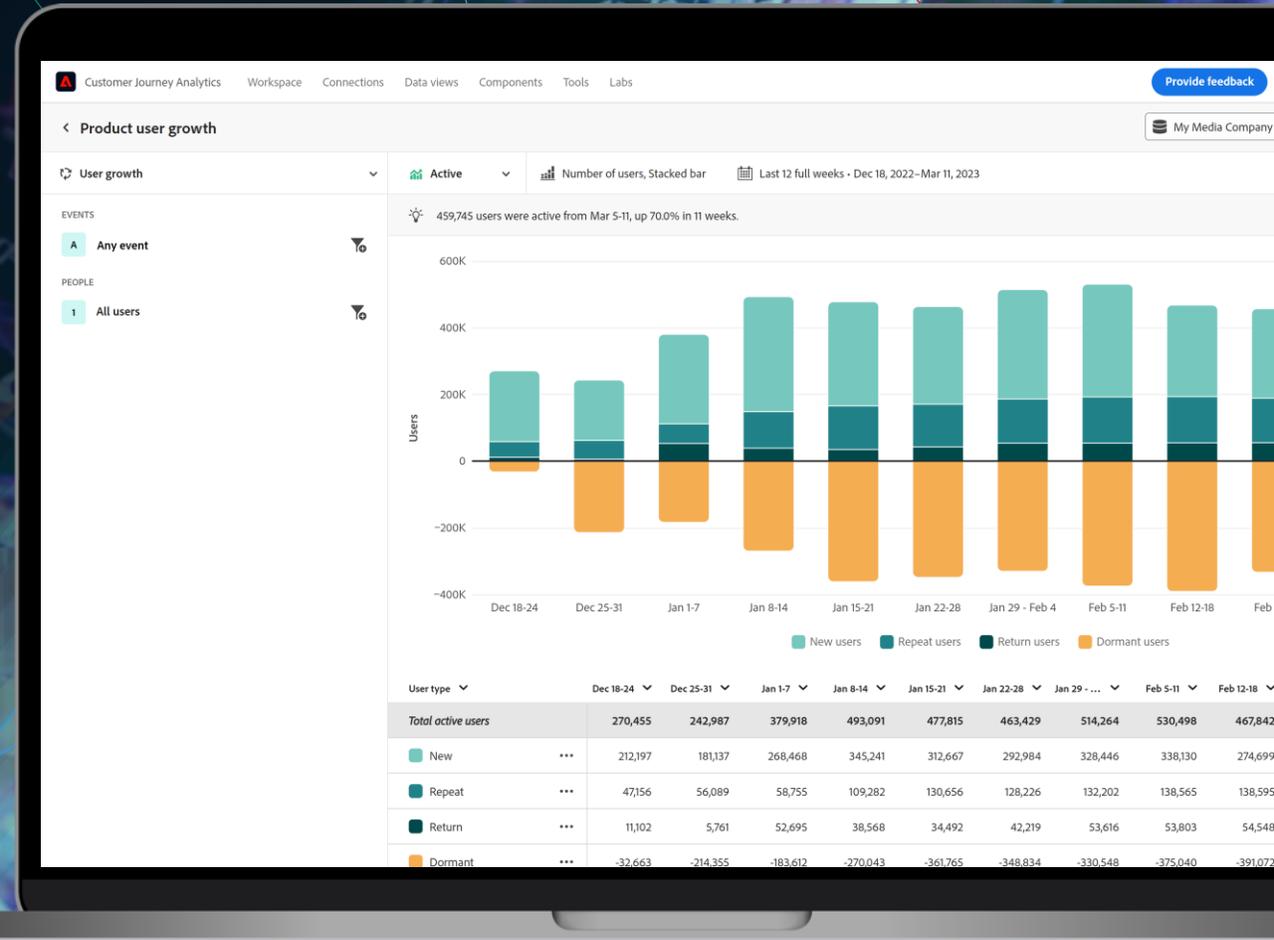

More likely to meet or exceed their customer experience goals

25%

Able to **increase** their customer retention rates **by up to 25%**

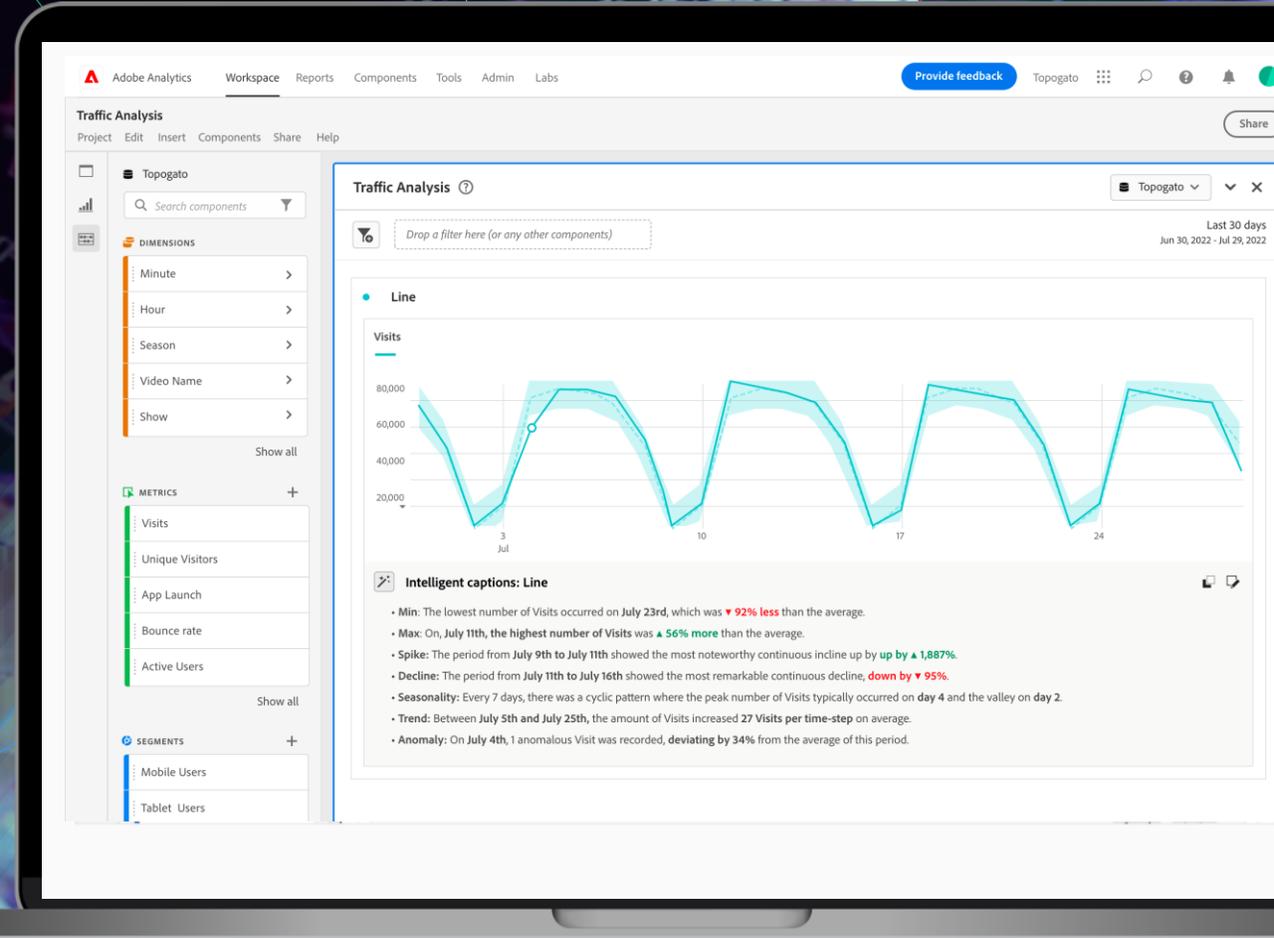

Adobe Product Analytics

Enabling product teams to quickly self-serve without the assistance from an analyst, leading to quicker data-driven product decisions.

Intelligent Captions

Natural language captions generated on demand to quickly gather insights from data visualizations for novice analysts and business users.
