# Adobe Acrobat Sign ✕ Notarize℠

The faster, easier way to notarize documents.

The Adobe Acrobat Sign integration with the Notarize platform gives you seamless access to online notarizations.

Even with the wide acceptance of e-signatures, the process of notarizing documents remains widely paper based and manual. This means documents requiring notarization end up creating inefficient, paper-based processes that require scheduling in-person meetings along with wasted time and money on travel, printing, shipping, and storage. These processes get even more complicated in the new hybrid business environment. To address these issues, Adobe Acrobat Sign has extended its digital document workflows to include notarizations—thanks to the integration with Notarize, the top-rated online notarization platform.

Note: Notarize capabilities are available as an add-on to Adobe Acrobat Sign Solutions, which is a specific offering in the Acrobat Sign product line. You must subscribe to Acrobat Sign Solutions, in order to use the Notarize service with your Acrobat Sign product. The Notarize service is a third-party product resold by Adobe. Use of the Notarize service requires a separate agreement with Notarize. Adobe makes no representations or warranties, express or implied, about the Notarize service.

Reduce costs and save time.

Using Adobe Acrobat Sign with the new Notarize integration reduces costs associated with printing, mailing, filing, and storage while eliminating time-consuming activities, like scheduling and traveling to in-person meetings. Signers are now able to get digital PDFs notarized online in minutes, instead of days or weeks—without leaving their home or office. And notaries have quick and convenient access to their digital notary journal and video recordings of their notarial sessions on the Notarize platform.
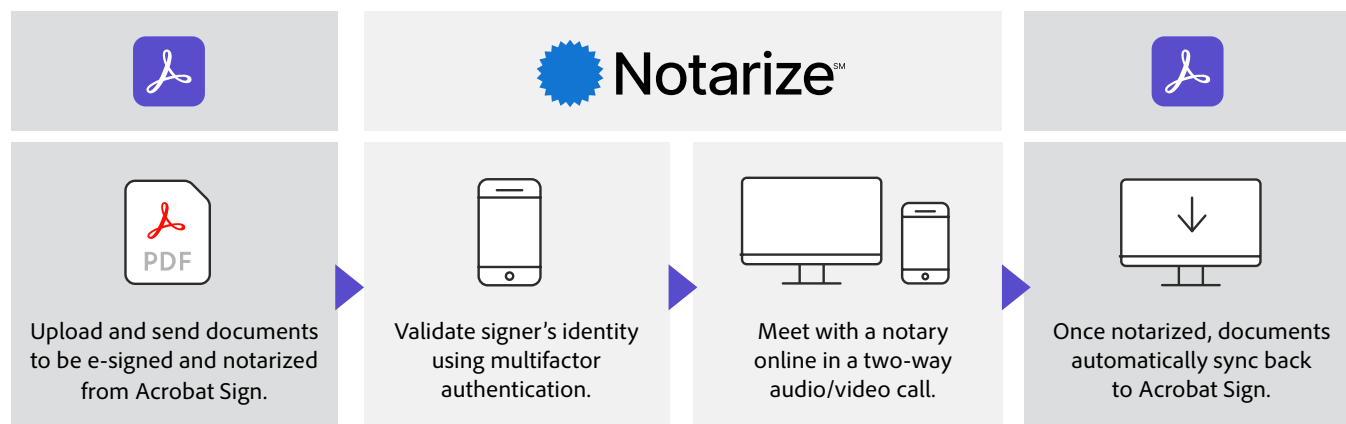

Support for in-house and on-demand notaries.

Use Notarize's in-house notary service to route notarizations to your own in-house notaries and Notarize's on-demand notary service to connect your signers with Notarize's network of commissioned notaries. You can also choose a hybrid approach if you'd like to use your in-house notaries along with on-demand notaries for off-hours or overflow situations. Either way, your notaries and signers will have an exceptional digital experience.
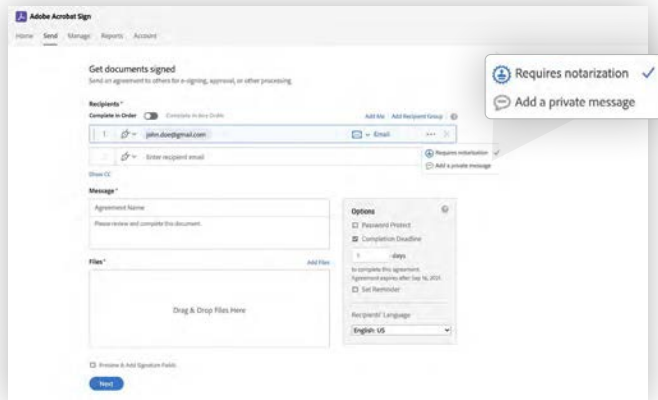

Deliver end-to-end digital workflows—that now include remote online notarization.

Initiate online notarizations directly from within Acrobat Sign. Signers' identities are validated through multifactor authentication or the notary's personal knowledge of the signer's identity. The signer is connected with a commissioned notary in a two-way audio/video call to complete the notarization. Document status can be tracked at every stage within the Acrobat Sign Manage tab. Once documents are e-signed and notarized, they are securely stored in Acrobat Sign with a tamper-evident audit trail.
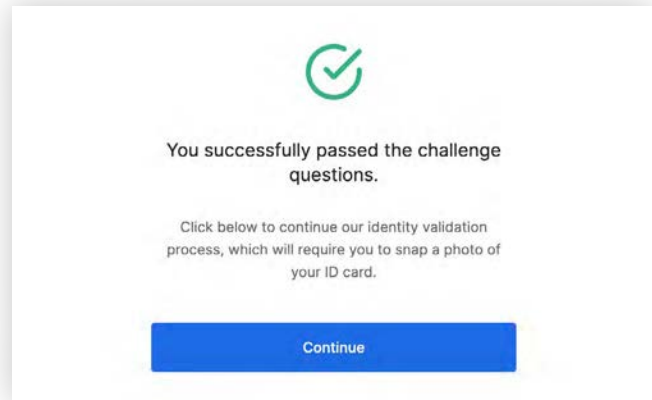

How it works

Notarize℠

Upload and send documents to be e-signed and notarized from Acrobat Sign.

Validate signer's identity using multifactor authentication.

Meet with a notary online in a two-way audio/video call.

Once notarized, documents automatically sync back to Acrobat Sign.

The Adobe Acrobat Sign x Notarize integration at a glance.

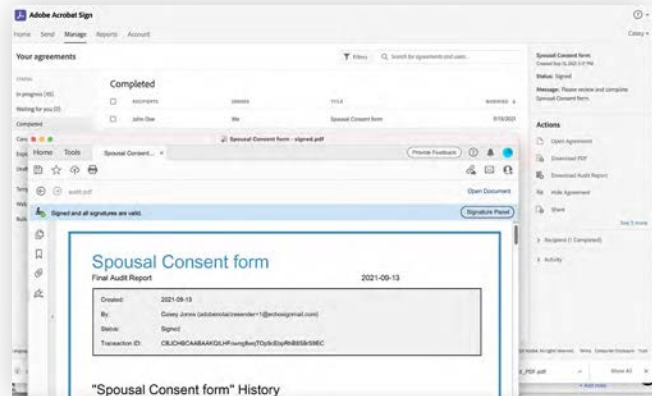

Upload and send PDF documents to be e-signed and notarized while tracking document status from within Acrobat Sign.

Validate identity through personal knowledge or multifactor authentication, including KBA and credential analysis.

Certified notaries meet with signers in a two-way video call to review, e-sign, and notarize documents.

Once notarized, documents are automatically sent back to Acrobat Sign and securely stored with a tamper-evident audit trail.

Make the move to all digital workflows.

There's no question that e-signatures help organizations deliver efficient and exceptional signing experiences. By adding online notarizations to your digital document processes via a robust and trusted integration, you can extend those efficiencies and exceptional experiences even further.

About Notarize

Notarize is one of the first platforms to enable people to sign and notarize documents online, 24x7. Notarize's trusted products and services are digitizing and rewiring industries to bring trust to life and business's most important moments and make them more convenient, secure, and verifiable.

About Adobe Document Cloud

Adobe Document Cloud provides an integrated set of apps and services—including Adobe Acrobat, Adobe Acrobat Sign, Adobe Scan, prebuilt integrations, and robust APIs—that accelerate business and improve end-to-end employee and customer experiences by enabling more secure, compliant, and automated digital document and e-signature workflows.
