Adobe® Type Manager® Deluxe 4.1

Font management made easy

In 1989, Adobe Type Manager (ATM®) software changed the face of desktop publishing. By smoothing out the jagged edges of type on-screen and significantly improving print quality, ATM redefined "what-you-see-is-what-you-get." Adobe Type Manager Deluxe 4.1 offers a more versatile way to manage your OpenType, PostScript, and TrueType fonts. Powerful features help you work more efficiently while producing the same sharp, clean text that you have come to expect from the award-winning ATM software.

Get organized
No need to shy away from using your full spectrum of fonts in ever-changing configurations—ATM Deluxe 4.1 makes cumbersome font management routines a thing of the past! Using interactive control panels, install typefaces with point-and-click simplicity. Create custom font sets that apply to different projects, users, or any other classification you choose, and then activate and deactivate the typefaces you need— in sets and individually—in seconds.

Be more productive
Because you activate only the fonts you need at any given time, your system can work faster, and you can work more efficiently. Creating sets doesn't actually move your font files; it simply groups representations of them. So you can place the same font into as many sets as you'd like without using additional disk space.
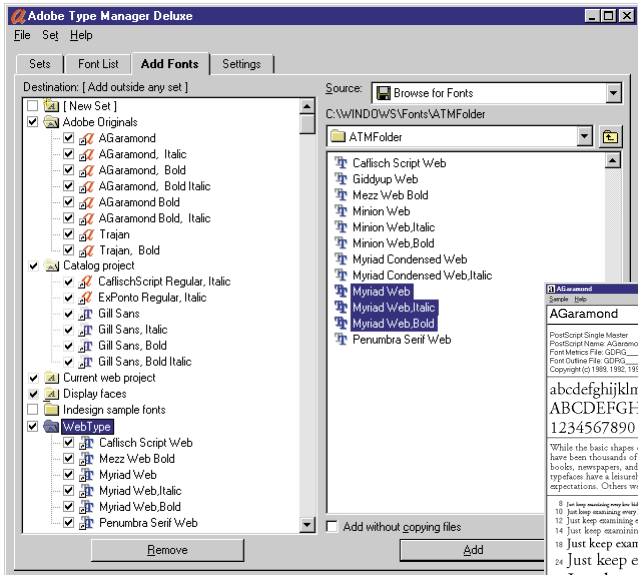

Design with confidence
Take advantage of the ability to smooth Type 1 font edges on-screen, and easily create multiple master font instances. Interactive controls let you adjust weight, width, style, and optical size axes. ATM Deluxe 4.1 includes 15 fonts from the Adobe Type Library, so every document you create will feature beautiful, visually compelling text— and with screen and print sample previewing, you're assured the letter-perfect look every time! When you're ready to print, ATM Deluxe 4.1 will deliver crisp, clear type on Adobe PostScript and non-PostScript printers alike.
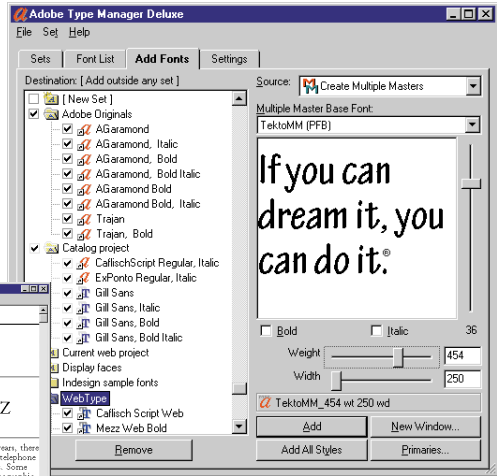

Rely on the industry leader
However you employ fonts in your documents, count on ATM Deluxe 4.1 to streamline font management so you can work more efficiently while producing crisp, great-looking type!

Adobe® Type Manager® Deluxe 4.1

The point-and-click interface lets you activate and deactivate font sets instantly.

Create multiple master instances easily. Then drag and drop them from the sample window into sets.

Full WYSIWYG previews of all your fonts help you choose the best font for the job.

Key Features

- Group OpenType, PostScript, and TrueType fonts into sets
- Activate and deactivate sets with a mouse click
- View and print font samples
- Create multiple master font instances
- Install and remove fonts easily
- Get crisp, clean output from any printer, including non-PostScript printers

Contents
