- Flash Player 9 for Linux & Solaris.
- High Speed connection is recommended for viewing multimedia content over internet.

Product Updates

Category	Feature	Description
Office 2007	Office 2007 Support	Presenter 7 supports authoring and publishing with Office 2007, including support for .pptx format.
Multi-media Content	Flash Video in Output	Presenter 7 output would be able to play Flash video embedded in the slides. The video can be played as part of the content or as talking head video.
	Import video from any format	It is now possible to import video from almost any format and embed as flash video on the slides. Supported formats include: Flash video (flv); Windows media files(asf, wmv, mpg); Quick time files (mp4, dv, dvi, mov, 3g)
	Capture video	One can also capture video from source (such as webcam) and embed it as content or talking head video on a slide or simply save it to disk.
	Advanced Multimedia Controls	Presenter now has advanced controls for multimedia like “video settings” option to Trim and add visual effects to the video.
	Support for high quality audio output	Published output can have High quality audio (upto CD quality).
Quizzing	Importing questions from existing quiz	Questions can now be imported from the existing Presenter quizzes.
	Quiz Pane in Output	The Outline pane in the sidebar becomes a ‘Quiz Pane’ for display of dynamic info specific to a quiz such as scores (max, current, pass etc.), attempts, questions remaining etc. The info to be displayed in the Quiz Pane can be configured from the Quiz Manager
	Question Pools	Questions can now be organized into groups. Quiz can be generated in the output by randomly picking up a given number of questions from a group.
	Question Shuffling	The order in which questions would appear in a quiz can be shuffled at quiz level and question group level.
	Option Shuffling	The order in which options (answers) to the questions appear can also be shuffled.
	Quiz Boundary	If a user taking a Quiz tries to move out of a Quiz

	Verification	boundary and there are questions still left, the user would be provided with a warning message
PDF	PDF Output	Presenter output can now be packaged into a PDF file. The output can also be played back within the PDF. The option to do this is available in the publish menu. Please note that viewing of PDF file created from Presenter would require Acrobat Reader 9.0
Enhanced Configurability & Usability	Configure directly from Slide Manager	Users can change settings for various elements/assets associated with a slide from the slide manager itself.
	Navigation restriction	Navigation restriction can now be applied to individual slides from slide manager.
	Bulk Formatting for Quiz Questions	Appearance/formatting of quiz questions can be configured for fonts, font size and button placement and position on the slide. This is available in the Quiz Manager in the "Appearance" tab. The settings can also be saved and reused.
Mobile Viewing	Output for Mobile	Presenter 7 creates viewer files (viewer_lite.swf) optimized for viewing content on mobile devices supporting Adobe FlashLite 3
Others	New format for storing audio assets	Presenter now stores audio clips as separate files in asset folder. The new architecture would allow to get rid of the various issues related to PPC files. While the new format would now be the default, there is an option to export to a format compatible with older versions of Presenter.
	Import / Reuse presentations and quizzes created using Articulate	You can re-use / import content (including quizzes) created with Articulate using Presenter 7.
	Support for Vista	Presenter 7 supports Microsoft Vista

Known issues

- Uninstalling Adobe Presenter 7.0 will not uninstall Flash Player 9.
- As a general rule, all features of PowerPoint 2007 which are lost when imported to PowerPoint 2003 will not be published. For complete details visit Office 2007 issues page..

- If Adobe Presenter is disabled then to enable it do the following.
 - For Office 2007
 - Go to PowerPoint Office Button >PowerPoint Options.
 - Click on Add-Ins and select Disabled Items in Manage dropdown and press on Go button
 - Select Adobe Presenter add-in and press Enable button
 - For Office 2003
 - Go to PowerPoint Help >About Microsoft Office PowerPoint.
 - Click on Disabled Items button and select Adobe Presenter add-in and press Enable button.
- H.264 videos in Presenter content when posted to Connect 6 may not play while viewing.
